

Vertical AI Readiness Checklist

1. Process Automation Potential

- Do your teams spend significant time on repetitive tasks?
- Are there clearly defined, rule-based workflows in your operations?

2. Data Availability & Quality

- Do you have access to structured, domain-specific data?
- Is your data clean, labeled, and regularly updated?

3. Domain Expertise Access

- Do you or your team have deep understanding of your industry's workflows?
- Can you identify key inefficiencies in current processes?

4. Technology Infrastructure

- Do you have the tools and integrations to support AI deployment?
- Can you securely manage data sharing, APIs, and compliance?

5. Leadership Buy-In

- Are decision-makers aligned on exploring AI-driven solutions?
- Is there a defined budget or roadmap for AI initiatives?

6. Change Management Readiness

- Is your team open to adopting AI-powered workflows?
- Do you have a plan to train or upskill existing staff?

Scoring Matrix (inside the PDF)

0–4: Not Ready → Start with foundational AI education

5–8: Partially Ready → Identify pilot projects and build data pipelines

9–12: Ready to Implement → Move toward deployment with a vertical AI partner
